Payment - Invoices

All you need to know about invoices and the payment procedure

Hi there! Here is a guide on how to use OKX, the crypto wallet that most employees are using. If you've been using another wallet of your preference, feel free to continue with that one.

OKX Tutorial

Registering an account on OKX only takes a few minutes. Here's how to get started, step by step[1]. All of the following information has to be done in the **"Exchange" tab** of the platform. All operations will also be done using the Exchange tab, and **NOT the Wallet tab**.

On the App

- You have multiple options to get started - log in seamlessly with your Google, Telegram, or Apple account. Alternatively, you can create your OKX account by registering at the beginning of the process.

- OKX follows a comprehensive **KYC (Know Your Customer) procedure to ensure a secure and compliant trading environment**. During the verification process, it'll ask you to input your country and undergo ID verification

- The platform offers two verification levels: basic and advanced. For the primary verification, OKX requests a clear photo of your ID document. It also offers an advanced option. In addition to the ID document, it'll ask you to provide a selfie, further reinforcing the security measures in place.

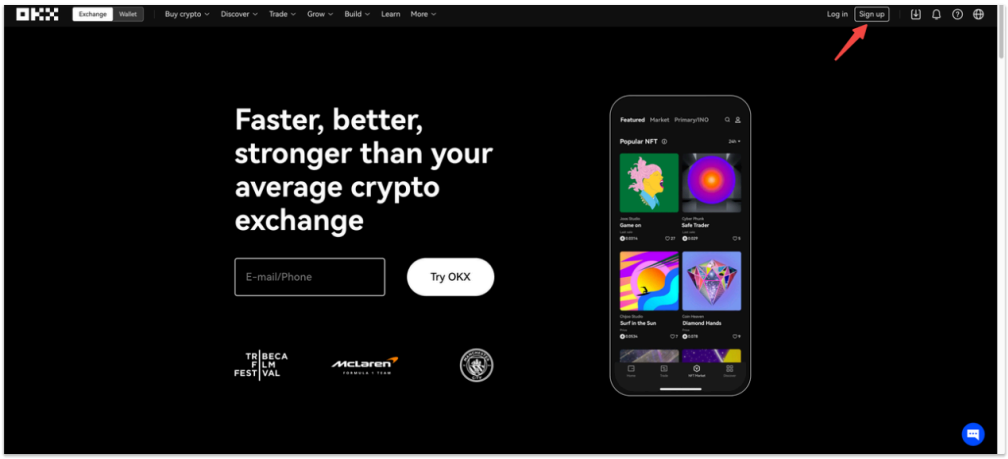
- Once the process is over, you should change to OKX Pro. There you will find a similar interface to Binance.

On the Website

Step 1

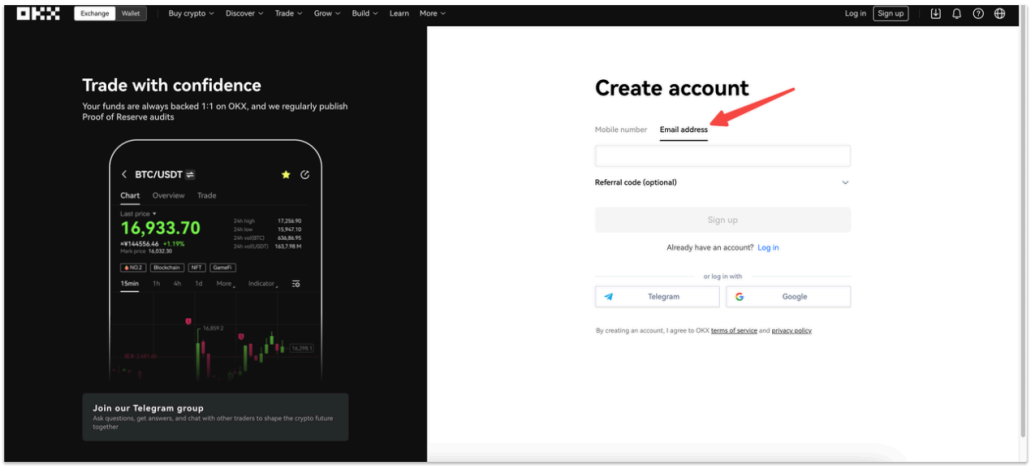
Head to the OKX homepages' top right corner and click Sign up.

[1] How to register an account on OKX



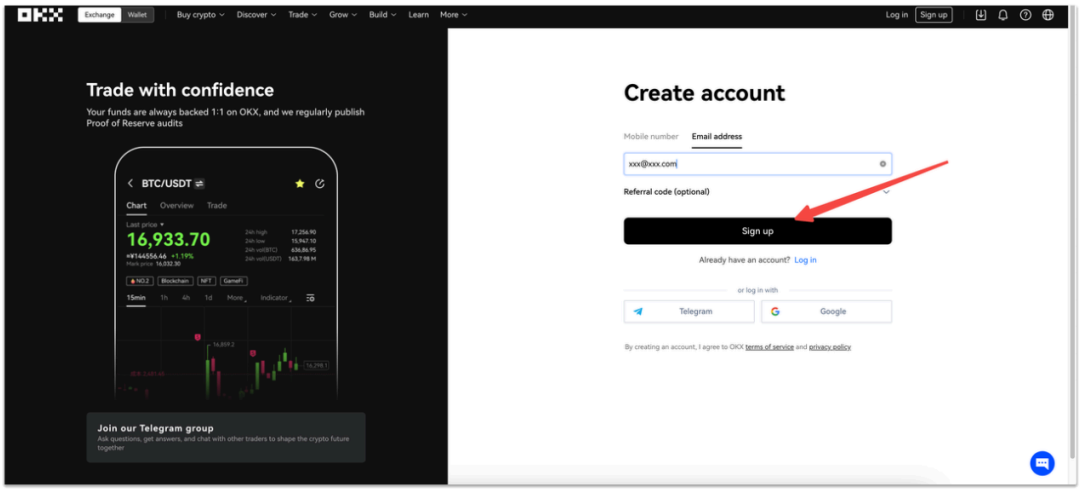
Step 2

Enter your email address in the Email field.



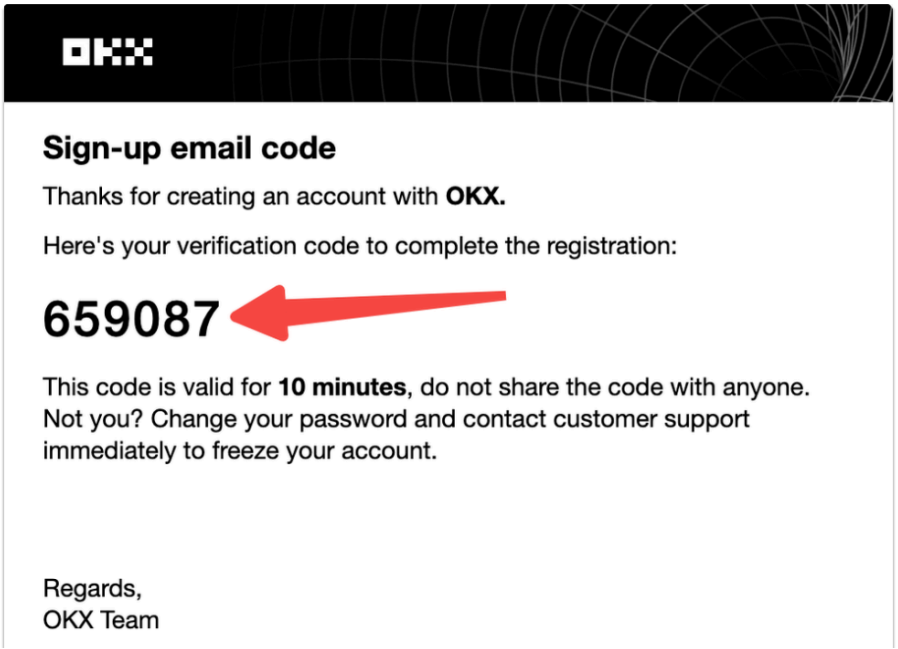
Step 3

Click Sign up when you're ready to sign up with your email address.



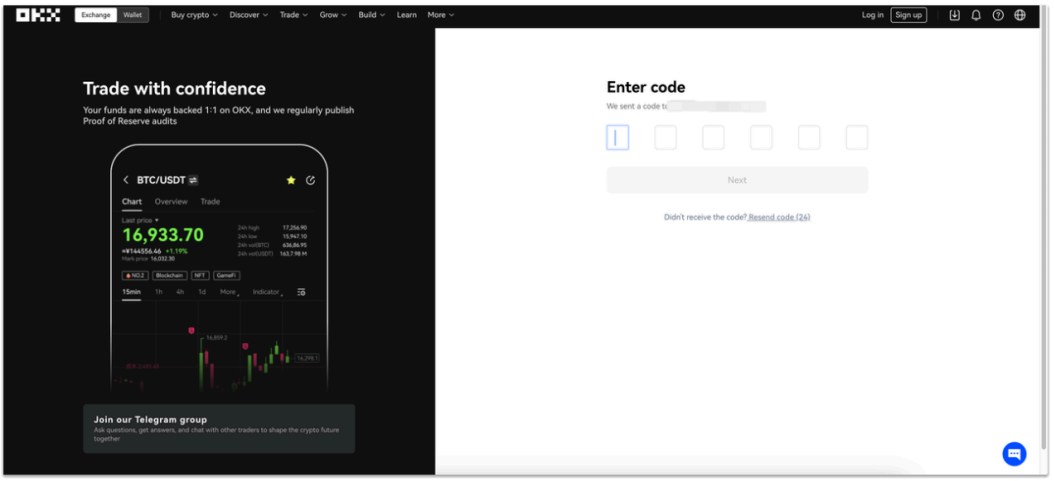
Step 4

Check your email for the six-digit registration verification code OKX sends you.



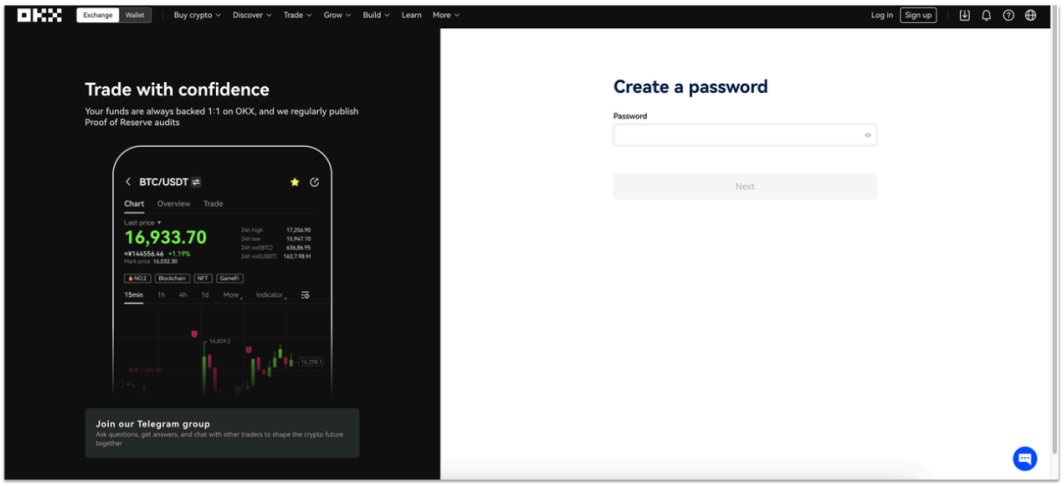
Step 5

You will have 10 minutes to enter the verification code into the Enter code field. When you've done so, click Next to continue.



Step 6

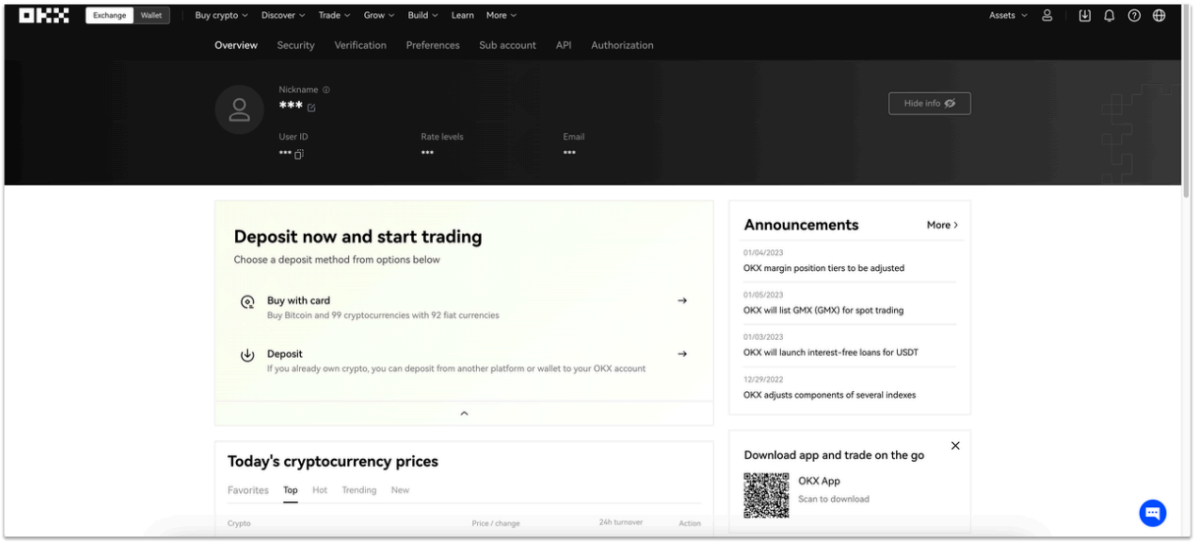
Enter the password you want to protect your account within the Password field. Click Next when you're satisfied.



Step 7

You can now access your OKX account dashboard. To get started you have two options:

- Buy with the card, which allows you to buy Bitcoin and 99 other cryptocurrencies with 92 fiat currencies.
- Deposit: If you already own crypto, you can deposit from another platform or wallet to your OKX account



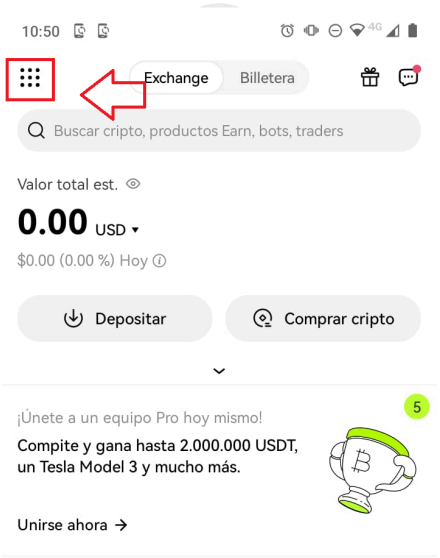
How to Withdraw

On this link, you will find the step by step to Withdraw your crypto to fiat on your bank account. The process is the same as you were doing on Binance.

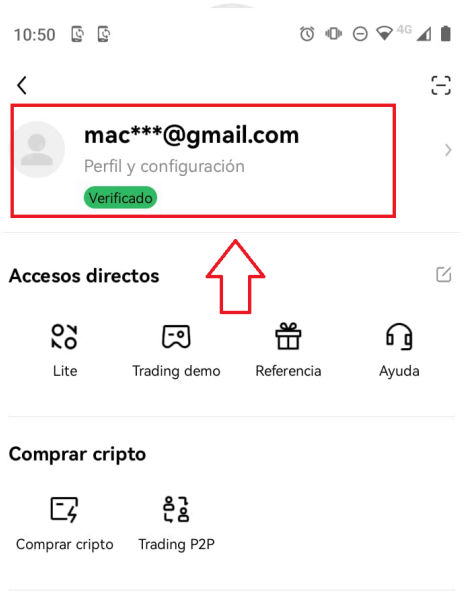
OKX ID and Wallet Address

- **OKX ID**

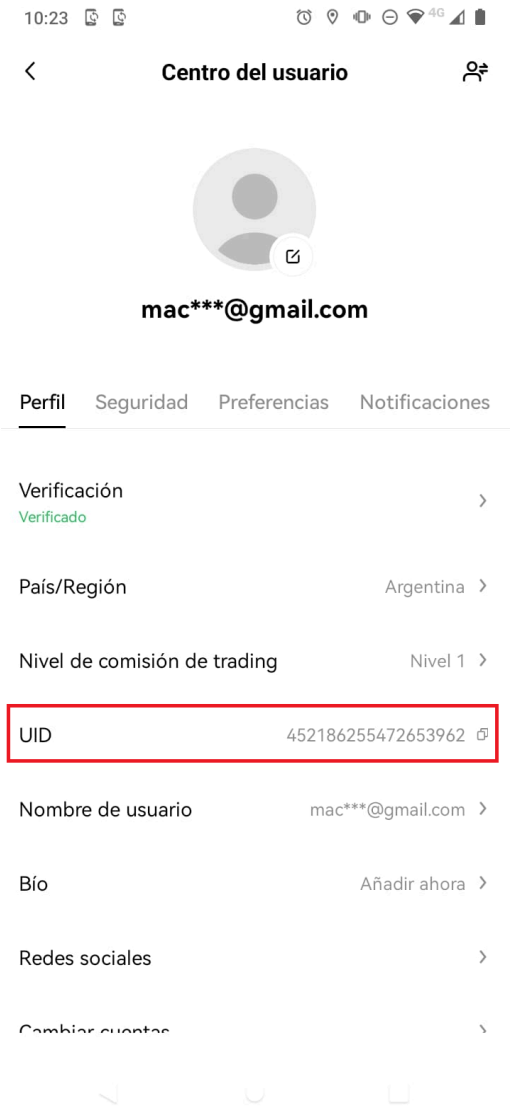
1. **Click on the left menu**



2. **Click on your profile name**

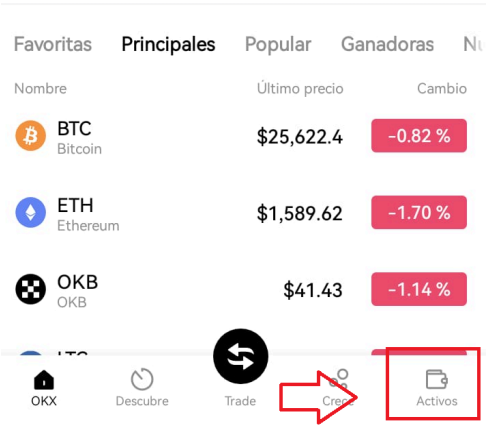


3. **There you will find your OKX ID**

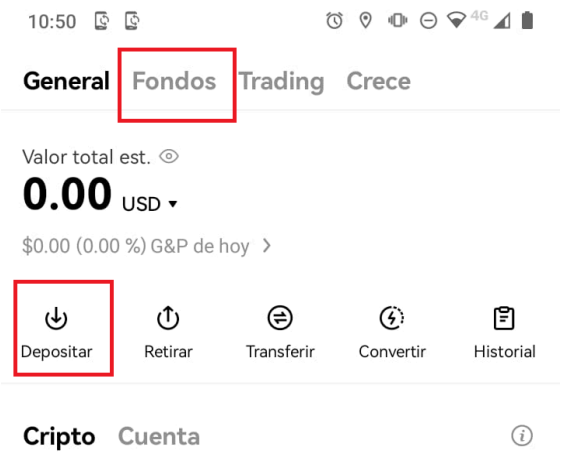


- **Wallet Address**

1. **Click on your wallet icon on the right side of the bar menu**

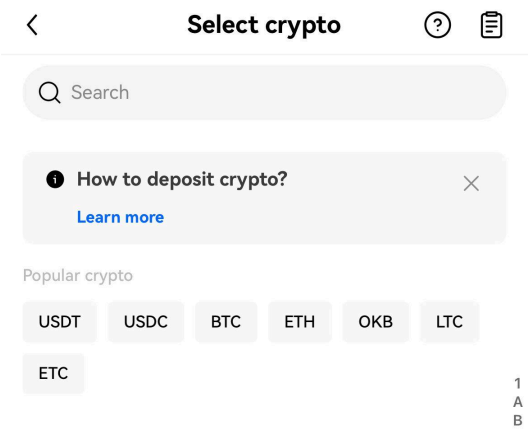


2. **Choose your “Founds” wallet and click on “Deposit”**

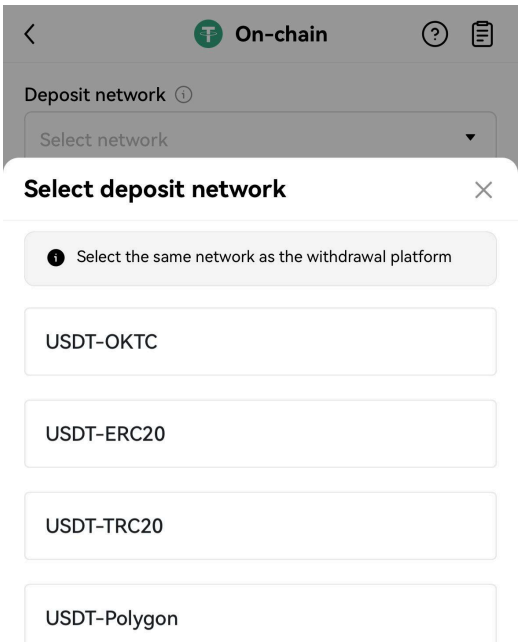


3. **Click on the “Crypto” method and you will find your wallet ID**

4. **Once there, you should choose “USDT”.**



5. **Next, choose the “TRC20” network.**



INVOICES - Tutorial (hourly contracts)

In case you have an **HOURLY CONTRACT,** you must create an invoice and send it to these mails:

- f.cagnoni@novatidelabs.com
- r.anand@novatidelabs.com

- **Template:**

Here is the template you must use to fill in your invoice
